

There's Wonder All Around Us

Don Gnecco

There's wonder all around us, in the rising sun.
Hear the voices of children sing in unison.
There's beauty all around us, far as you can see,
Like the stars that shine at twilight
There's a light in me.

There's wonder all around us, no matter where you go:
On the tops of mountains, in the vale below.
There's beauty all around us, far as you can see,
Like the stars that shine at twilight
There's a light in me.

Everywhere around us, if we stop to see,
All the world is full of wonder, all in harmony.

Modulation

There's wonder all around us, in a baby's cry,
When we hear a mother, sing a lullaby.
There's beauty all around us, far as you can see,
Like the stars at twilight, there's a light,
There's a light in me.

There's beauty all around, no matter where you go.
From mountaintops to oceanside, where waves are crashing;
Hear the soothing sounds, and see the wonder,
The wonder all around.
